

The API is seeking high quality electrical, mechanical, mechatronics, data, science, and renewable energy related engineering students with an interest in the power industry to apply for one of up to 30 bursaries. The bursaries provide a \$1000 payment for every year of study, the opportunity of at least one paid vacation placement in the power industry + more professional development opportunities.

"The decision to join the API Bursary Program was the best decision I made. API created invaluable networking experiences and provided assistance with securing vacation work which developed my career beyond theoretical/university expertise"
- API Bursary Holder
